EDUCATION

Master of Science, Computer Science

May 2024

California State University, Long Beach, California

Coursework: Analysis of Algorithms, Foundations of Artificial Intelligence

Bachelor of Engineering, Computer Engineering

June 2022

Pacific School of Engineering, Surat, India

CGPA:8.37/10.00

TECHNICAL SKILLS

Programming: JavaScript, Python, C++, C, C#, SQL, PHP, HTML, CSS

Technologies: MySQL, MongoDB, GIT, AWS

EXPERIENCE

Backend Developer

August 2021–July 2022

RejoiceHub Solutions, Surat, India

- Proficiently developed RESTful APIs in Node.js to meet the requirements of websites and applications.
- Successfully managed the backend teams for multiple projects, such as Aaziko and TweetFox.
- Built and maintained records of data in MongoDB databases.
- Gained knowledge of version control tools like Git and GitLab.
- Worked together with clients and management to establish product standards.

Android Developer Intern

June 2019–November 2019

Success InfoTech, Surat, India

- Built a real-time Android application to sharp programming skills in Java and for in-depth understanding of OOPS concepts.
- Gained practical experience in app development as an Android Developer Intern and worked in team to implement new features, debug issues, and become used to an agile environment.
- Completed 5+ two-week sprints and participated in sprint retrospectives and daily standups.
- Gained knowledge about the Android development lifecycle by participating in team projects.

PROJECTS

Hotel Management System

2023

C#, MYSQL

- Created a variety of APIs for hotel management operations for demonstrating proficiency in database management and software development.
- Developed a practical and user-friendly system using practical coding abilities and database knowledge.
- Updated and maintained the backend code frequently to fix and issue.
- Created documentation for the entire website's APIs and backend components.

Aaziko

2022

NodeJS, MongoDB, ReactJS

- Created and implemented APIs that facilitate seamless communication between the application's front-end and server side.
- Developed server-side code to handle incoming requests and outgoing responses from the client-side of application.
- Engaged in close cooperation with front-end developers to harmoniously merge server-side capabilities with the user interface.
- Conducted thorough testing and debugging of server-side code, guaranteeing alignment with functional and performance benchmarks.
- Analyzed and solved problems that occur in execution.

TweetFox

2022

NodeJS, MongoDB, Flutter

- Effortlessly integrated external APIs, such as the Twitter API and various analytic tools.
- Designed and implemented RESTful APIs for both web and mobile clients.
- Gave security and scalability top priority in the infrastructure to guarantee a reliable system and worked closely with the frontend team to imagine and implement cutting-edge features.
- Accurately detected and resolved production-related issues.

CERTIFICATIONS

- [Java Developer](#) (LinkedIn Learning)
- NodeJS Developer (RejoiceHub Solutions)
- Android Developer (Success Infotech)
